# Interface for NVDA Software

Screen Reader Interaction ... x +

mode-virtual.html

## Screen reader basics (h1)

NVDA (NonVisual Desktop Access) is a free "screen reader". NVDA can be downloaded from [NV Access](#) website.

JAWS (Job Access With Speech) is the most popular screen reader. JAWS has demo version that runs for 40 min and can be downloaded from [Freedom Scientific](#) website. Both NVDA and JAWS works with Microsoft Windows.

## Modes of Interaction (h2)

- Read/Virtual/Browse Mode to browse webpages and
- Forms/Focus Mode to interact with form elements.

NVDA, "Speech Viewer" tool shows a text version of what is spoken and "Focus Highlight" addon makes element read highlighted which makes it easier to follow the screen reader

## Keyboard commands/shortkeys (h2)

To get list of elements use **NVDA + F7** in NVDA or **INSERT + F3** in JAWS. The shortcut in NVDA brings up a window showing the links, headings and landmarks for a page. From this list the user can select an item to go to.
